You should consider using the mobile version if you are unable to access the Betano mobile app for a variety of reasons. It is similar to the applications only that you have to use a browser to access the website. The operator uses the same theme as that of the desktop version but implements a new structure. Notable Apps Features

Betano is among the recent and the most respected online betting sites. It contains a variety of useful components that you can barely find on other punting sites. The operator was also thoughtful enough to pack its mobile app with a variety of notable features including:

Some of the sports covered in this section include soccer, tennis, basketball, volleyball, and table tennis. Each sporting category on the live betting section has several ongoing betting matches available. As a result, gamblers can quickly know which sport has more selections.

Cash-out There is also a practical cash-out option for any gambler using the Betano mobile app. The feature works the same way it does on other bookies. That is by allowing you to punt on different matches long after they have begun. Using your smartphone, you can cash-out even if only a few minutes are remaining to game completion. However, you should be great at cashing out if you want to benefit from the feature. Otherwise, you will end up making unwarranted losses. The amount of money you get after cashing out depends on the bookie's calculations together with the odds sizes at the moment of cashing out.

Are you afraid of missing the bet request on the mobile platform? Well, you shouldn't be. The bookie was considerate enough to include Betano's bet request feature on its iOS and Android apps. You can, therefore, request for a particular bet from the sportsbook using your smartphone. These requests are, however, not for free, given that you have to pay a certain amount of money for the bet. With the bet request feature, you don't have to punt on an event without a prediction you want. That makes Betano mobile app very accommodative.

Available Betting Options through the Mobile App

The betting categories on Betano are mesmerising. The operator squeezed every section on the platform so that those who don't like sports betting can find plenty of many other games to gamble. The main gambling variants you will get include:

Sports Betting

Sports betting is the page where you will find sports like football, tennis, basketball, volleyball, and darts. To bet you have to locate the game, do an intensive analysis, and finally place a bet. The matches you get on this section are fresh since the operator updates the list as soon as a game is confirmed. You will love the odds and the multiple betting markets available.

Casino

The casino section is accessible using the chip nicely placed at the bottom right corner of the mobile app. Once you load the page, you will come across various video slot variants, including Polter Heist, Reel Keeper, Night Queen, and wonder Hounds. If you are a table game fan, then look forward to exclusive products, for instance, Blackjack Double Exposure, Jacks or better multihand, and Baccarat. Live casino games are separated from other casino gaming products due to their distinct features and appealing outlook, for example, realistic background noises and exciting themes. They also boast of immersive gameplay, which involves multiple players. You will find the live game selections to be up to the required standards, for instance, All Bets Blackjack, Deutsches Blackjack, and Speed Roulette.

eSports

Lastly, there is the eSports section, which features select gaming variants. It is also the page where you can live stream HD games using the Betano mobile app. The category is flooded with matches from games like Leagues of Legends, Dota 2, and CS: GO. These sporting events are easy to punt, and also they don't require intense analysis for you to make the right prediction. Another thing that will intrigue you in the section are the eSports betting markets, as well as the fantastic odds sizes.

Mobile App vs Mobile Version

Making a comparison between the mobile app and the mobile version is vital in enabling you to understand which of the two is better. The mobile app is very efficient in terms of accessibility

and usability. You don't need to start opening browsers to search for the website's URL. It is also easy to operate compared to its counterpart, the mobile version. However, the app requires you to have enough RAM and storage space for you to download and install. That is a negative that you will not have to worry about when using the Betano mobile version.

System requirements

Every mobile betting app has system requirements. That is because their codes are meant to interact well with particular systems. The Betano mobile app, for instance, is built for fast and capable operating systems. The apps require an iOS of 9.0 or higher or Android of at least 6. You also need to make sure that your phone's display is fantastic for it to output the website exactly how it is without altering some features. For a long time now, Samsung and iPhone variants have been topping the list of best phones to bet with. You can, however, opt for different models like:

One plus

Sony Xperia

Microsoft

Realme

iPhones

Samsung

Lenovo

Nokia

Blackberry

Huawei

Mobile bonus

As you can see from the details above, the sportsbook has a terrific mobile app and a compelling mobile version. However, it doesn't have a mobile package for smartphone users. Lacking such a Betano bonus is not a strategic move. But then using the comprehensive mobile app, you can access plenty of Betano offers for new and current customers. So consider using the options in the meantime.
